ATLANTA, GA – June 28, 2011 — [Orion Law Management Systems, Inc. \(www.orionlaw.com\)](http://www.orionlaw.com), a leader in Financial and Practice Management software for law firms, announces a new electronic billing delivery system making client invoicing faster, greener and more productive. The electronic invoices can be customized, automated and sent via email allowing for complete control of the billing process. Orion's streamlined bill delivery will become available on July 1st at no additional cost to Orion software maintenance & support customers.

The robust features of Orion's electronic bill delivery surpass any other application currently available by offering:

- Customizable email templates with drag and drop object control
- Automated PDF creation
- Password protection capability
- Integration with Outlook and automated sending queue
- Cover sheet option

Orion's bill delivery system dramatically decreases collection efforts by reducing the turnaround time between sending invoices and receiving payments. As a result, cash flow increases since

invoicing is more efficient, consistent and accountable. Electronic bill delivery aligns Orion with a growing industry-wide preference towards paperless communications, both for record-keeping and environmental reasons.

Orion president, Paul Yelton, comments, "The industry has been gradually transitioning to more efficient, cost effective and greener electronic bill delivery systems, and Orion is proud to lead the way. Our new billing delivery system is the most feature-rich application available on the market today. The technology is straightforward and easy-to-use.
