LawPay Integration

Orion ePay™ Powered by LawPay

Modern law firms need streamlined financial management and clients increasingly want the flexibility of paying online by credit card or eCheck. Now with the seamless integration between Orion and LawPay, effective solutions can be found for both needs.

Using the combined power of Orion ePay and LawPay, firms can be more profitable, improving cash flow while speeding-up their collection time. In addition, financial tasks can be done more accurately and securely which has both internal and external benefits for the firm. Here are just a few reasons why firms choose to accept credit cards and eChecks from their clients:

Ease of Use

- Orion ePay™ – The Orion-generated payment link can be added to invoices, cover sheets, reminder statements, and email templates for Orion’s Email Bill Delivery and Orion’s AR Collections Manager. In addition, client payments and trust deposits can be imported/processed at a click-of-a-button from Orion’s AR Manager.
- Client Initiated Online Payments – LawPay creates and hosts a secure payment page that can be used to easily take payments online. Each page is customizable and can be used to run in-office charges or can be linked to the firm’s website for simple, seamless payments.
- LawPay Mobile App & Swipe Tools – Setup an iPad LawPay’s Mobile App to allow your receptionist or attorney to enter the dollar amount and card number or use the LawPay mobile swiper to quickly and securely capture client’s card information.

LAWPAY
AN AFFINIPAY SOLUTION

The Orion-generated payment link for LawPay allows client payments to seamlessly apply to the proper invoice, eliminating the hassle of identifying the proper Client, Matter and Invoice.

“Orion’s software has proved to be an asset to our firm. Orion has continued to advance the available features and functionality throughout the years. I was impressed with the addition of Orion ePay powered by LawPay, which immediately allowed our firm to reduce steps in processing client payments via bankcard and eCheck. It adds to the security of our clients’ information, gives them more flexibility when making payments, and also gives us complete visibility over our daily bankcard/eCheck transactions. Both Orion and LawPay have phenomenal customer service and I would recommend this new feature to others. Orion is becoming a one-stop-shop software program for law firms.”

LawPay Integration

The LawPay Advantage

LawPay was developed specifically for the legal industry, providing law firms with a simple way to accept online credit card and eCheck payments from clients. Over the past 15 years LawPay has built a reputation as the go-to payment solution for firms of all sizes and the only payment technology vetted and approved by all 50 state bars, more than 60 local and specialty bars, the American Bar Association, and the Association of Legal Administrators.

LawPay Enterprise Features

Easier, Faster Payments

Send and accept client payments with a click. Firms that accept online payments are paid significantly faster compared to traditional methods, often within minutes of a bill being sent.

PCI Level 1 Security

Through LawPay's system's end-to-end encryption and tokenization that exceeds PCI Level 1 and data security standards, they keep end-user data protected and keep Orion out of scope for PCI.

ABA and IOLTA Compliance

LawPay is designed to protect against commingling of operating and trust fund accounts, as well as protect IOLTA accounts from any third-party debiting.

Integrated eCheck Payments

All LawPay accounts come enabled with our proprietary eCheck processing feature. eCheck payments enjoy all the same flexibility, security, and easy-to-use features as card payment options.
